Minibus Description

The 2026 (26) Ford Transit Connect 250 FlexCab Active L2 Van continues Ford’s mission to create the most adaptable compact van on the market. Designed for businesses that need a vehicle capable of switching roles throughout the day, the FlexCab Active offers a perfect balance of practicality, comfort and modern styling. With its rugged Active?series exterior detailing and enhanced cabin features, the 2026 model brings a fresh, premium feel to a proven and highly versatile platform.

At the heart of the FlexCab concept is its innovative sliding bulkhead system, allowing the van to shift effortlessly between a spacious 2?seat load?focused layout and a 5?seat crew?carrying configuration. This makes it ideal for operators who need to transport both equipment and personnel without running multiple vehicles. Whether navigating tight urban streets, travelling between job sites or accommodating extra team members at short notice, the 2026 FlexCab Active delivers unmatched flexibility for a compact van.

Powering the 2026 model is Ford’s refined 2.0L EcoBlue diesel engine, engineered for improved efficiency, lower emissions and smooth performance. Paired with an advanced automatic transmission and front?wheel?drive setup, it offers confident acceleration, excellent fuel economy and a relaxed driving experience. With the UK’s continued expansion of ULEZ and LEZ zones, the latest EcoBlue technology helps keep running costs down while ensuring compliance with modern environmental standards.

The exterior of the 2026 FlexCab Active showcases Ford’s rugged Active styling, including contrasting body cladding, signature grille design, roof rails, and premium alloy wheels. Practical touches such as wide?opening rear doors, integrated load?area lighting and durable protective panels ensure the van is ready for demanding daily use. Inside, the cabin is upgraded with high?quality materials, supportive seating, smart storage solutions and Ford’s latest infotainment interface, creating a comfortable and functional workspace for drivers and passengers alike.

Safety and convenience remain central to the 2026 model, with a suite of advanced driver?assistance features including lane?keeping technology, traffic sign recognition, rear parking sensors, and automatic emergency braking. These systems work together to support safer driving in busy environments and on longer journeys. Combined with Ford’s reputation for durability and low running costs, the 2026 Transit Connect FlexCab Active L2 stands out as a dependable, adaptable and forward?thinking choice for modern businesses.
