Minibus Description

The Used Ford Transit FWD Welfare Van has been developed to offer a reliable, comfortable, and fully equipped workspace for teams operating in remote or demanding environments. Built on Ford’s proven Transit platform, it provides the practicality and refinement expected from a well?maintained welfare vehicle, making it a strong choice for construction crews, utility providers, and field?based organisations.

Please note – this vehicle has now sold and is shown here for advertising purposes.

Inside, the welfare area is arranged to deliver a safe and functional space for staff to take breaks, prepare refreshments, and manage welfare needs throughout the working day. The layout typically includes dedicated seating, a canteen?style area, heating, hand?wash facilities, and secure storage, all positioned to maximise comfort and usability. Every feature is designed to support teams working long hours on site.

The front?wheel?drive Transit offers excellent traction and stability, particularly on uneven or unpaved surfaces, while also providing improved fuel efficiency compared to heavier driveline options. Its dependable diesel engine meets modern emissions standards, ensuring cleaner and more economical operation without compromising on performance or reliability.

Driver and passenger comfort benefit from Ford’s ergonomic cabin design, which includes supportive seating, intuitive controls, and a range of driver?assistance technologies depending on specification. The result is a welfare van that is not only practical on site but also reassuring and straightforward to operate on longer journeys between locations.

As a used model, this Transit Welfare Van delivers proven durability and value, backed by Ford’s established engineering and safety standards. It represents a smart, cost?effective solution for organisations needing a dependable welfare facility that can support their teams wherever the job takes them.
